Re: Generalized partially balanced incomplete block designs in Discrete Mathematics 67 (1987) 315–318.

In Theorem 3.1, (5) is replaced by

$$v, b = \alpha_1 b_1 + \alpha_2 b_2, \quad r = \alpha_1 r_1 + \alpha_2 r_2, \quad k_1, k_2,$$

$$\omega = \sum_i \lambda_{1i} |\lambda_{1j} - \lambda_{2j}|, \quad \text{for } \alpha_i = k_i |\lambda_{ij} - \lambda_{2j}|, \quad i \neq j; \quad i, j = 1, 2.$$

In Theorem 3.2, (7) is replaced by

$$v, b = k_1 b_1 + k_2 b_2, \quad r = k_1 r_1 + k_2 r_2, \quad k_1, k_2, \quad \omega = p.$$

The author is thankful to Dr. Kageyama for pointing out the omissions.
